This property offers impressive views and is a very private bowl waiting for an end user who desires privacy. Recently trenched power was brought in to a potential build site. Two pad sites were constructed taking in the views but also preserving privacy. There is a healthy mixture of cleared property and cover for wildlife. 2 grottos are present and will flow seasonally when normal rainfall occurs. The property is high game fenced on 3 sides. Tree cover consists of oak varieties, Spanish oak, madrone and some sycamore trees. Access is via blacktop road and through an electric gate. New interior roads have been built to the build sites. There is a pond that has been expanded & will hold water. There is a non-functioning water well close to the West property line. PEC power has been trenched into the property to the build sites. Access is through the Ranches of Brushy Top development. The ranch is not part of the subdivision but does participate in the road maintenance fund.
